Atlas of Dragonflies in Britain and Ireland

This full colour book (approx. 400 pages) represents five years work by volunteers and partner organisations to map the distribution of damselflies and dragonflies in Britain and Ireland. This much needed atlas summarises the distribution of over a million dragonfly records, and includes:

- > Species accounts, including maps, for all 56 resident and immigrant species recorded in Britain and Ireland
- > Four pages devoted to each resident species
- > Sections on habitats, conservation, distribution changes and phenology
- > High quality colour photographs of all species and their habitats

Pre-publication offer

£20.00

+ postage (see below)

Postage: £5 for UK and Ireland, £10 for Europe; £15 worldwide (excluding Europe).

Offer ends: 31st March 2014
