

# Under recorded areas: Monad of the Month and the All Wales Database, Aderyn

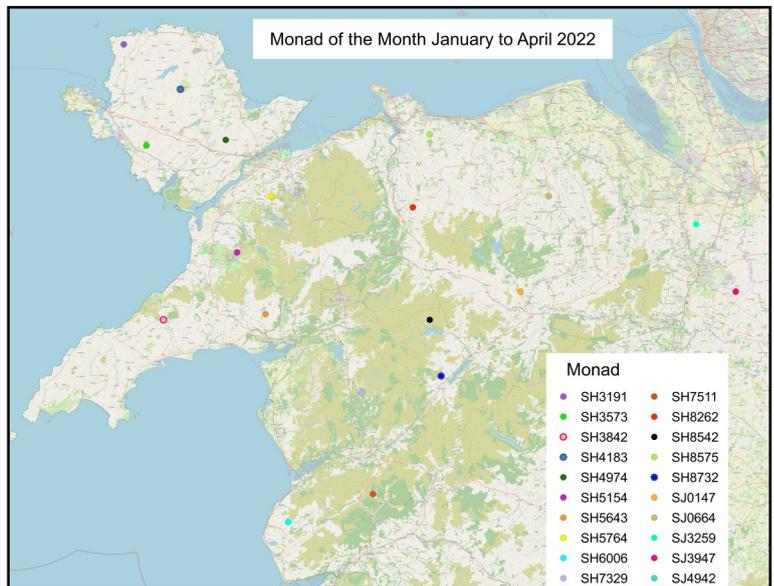

This month, instead of providing new Monad of the Month squares, we thought we would remind you of the monads that we have highlighted so far this year. They are shown on the map here and can be found throughout north Wales. More information about these and all our other published monads is available in the library section of the website at [www.cofnod.org.uk/Library](http://www.cofnod.org.uk/Library).

If these locations are too far away and you would like to see what wildlife has been recorded near to your home or indeed anywhere else in Wales, please consult the **Aderyn** database [aderyn.lercwales.org.uk](http://aderyn.lercwales.org.uk). Aderyn holds all the wildlife records collated by all four Local Environmental Record Centres in Wales. It can be used by the public without the need to log on or register with the website.

Two types of searches are possible. The 'What's in my area?' search will give you a list of what species have been recorded in a one kilometre grid square of your choosing, together with the number of records and the date when first and last recorded. This is a great way of finding out what recording gaps there are close to you.

The 'Distribution Maps' search allows you to select a species or an entire taxon group and display a 10km distribution map of that species or group. You can then select a 10km square and see a 1km distribution map. You could use this to explore which widespread common species lack records of their distribution, or where there are recording gaps for a particular taxon group that you are interested in.

We hope that you enjoy exploring the data with Aderyn, but note that maps and data are not to be used for commercial purposes and that records of sensitive species are excluded from 1km searches. If you have any feedback then do get in touch [contactus@cofnod.org.uk](mailto:contactus@cofnod.org.uk).

Aderyn  
LERC Wales' Biodiversity Information & Reporting Database

Aderyn is a Local Environmental Records Centres (LERC) Wales system, developed and maintained by the Biodiversity Information Service (BIS).

User Information: Log in or register if you are authorised to access restricted areas of this site such as planning applications or partner services. Contact us (using the details at the bottom of this page) for more information regarding who can receive elevated access to the data we hold. Each of the LERC's in Wales offer a Biodiversity Information service, tailored specifically for use by Environmental Consultants and developers. Click on the link 'Find your LERC' at the bottom of this page to go to the relevant LERC.

Aderyn :: What's in my Area? :: Search Results

Below are the results of your search for 1km grid square SH6630. Records are stored as polygons (based on their grid reference resolution). Only records stored at 1km or better resolution are returned. Species are ordered by category and then by scientific name.

The following 88 records matched your search from 7 different non-sensitive species. Search area 1.00 km<sup>2</sup>.

Any sensitive species within your search area will have been removed from the results. View the list of LERC Wales sensitive species [here](#).
