

No 27. 14 February 2009

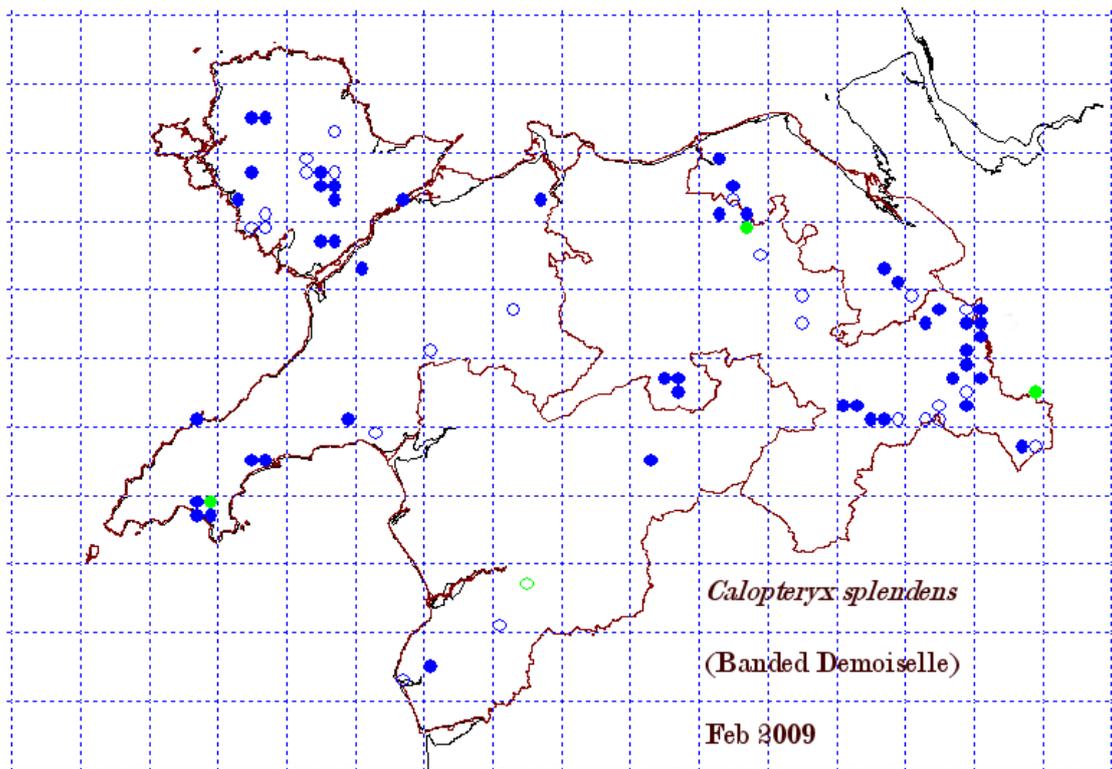

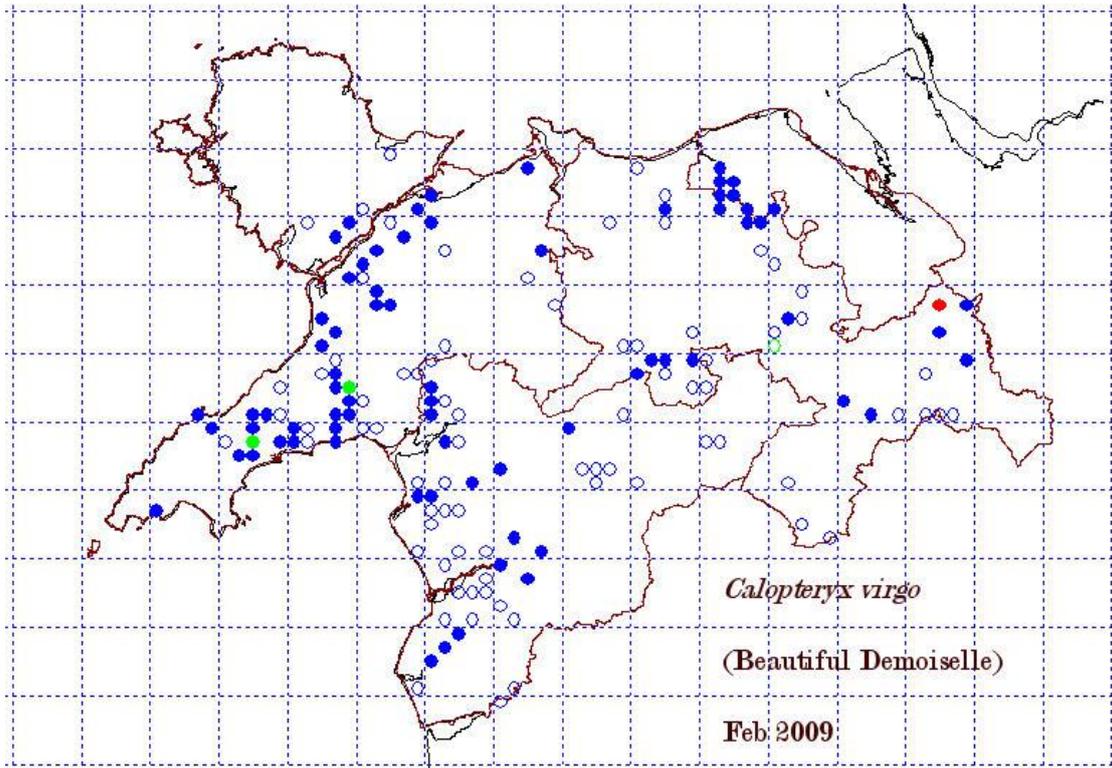

Hi all,

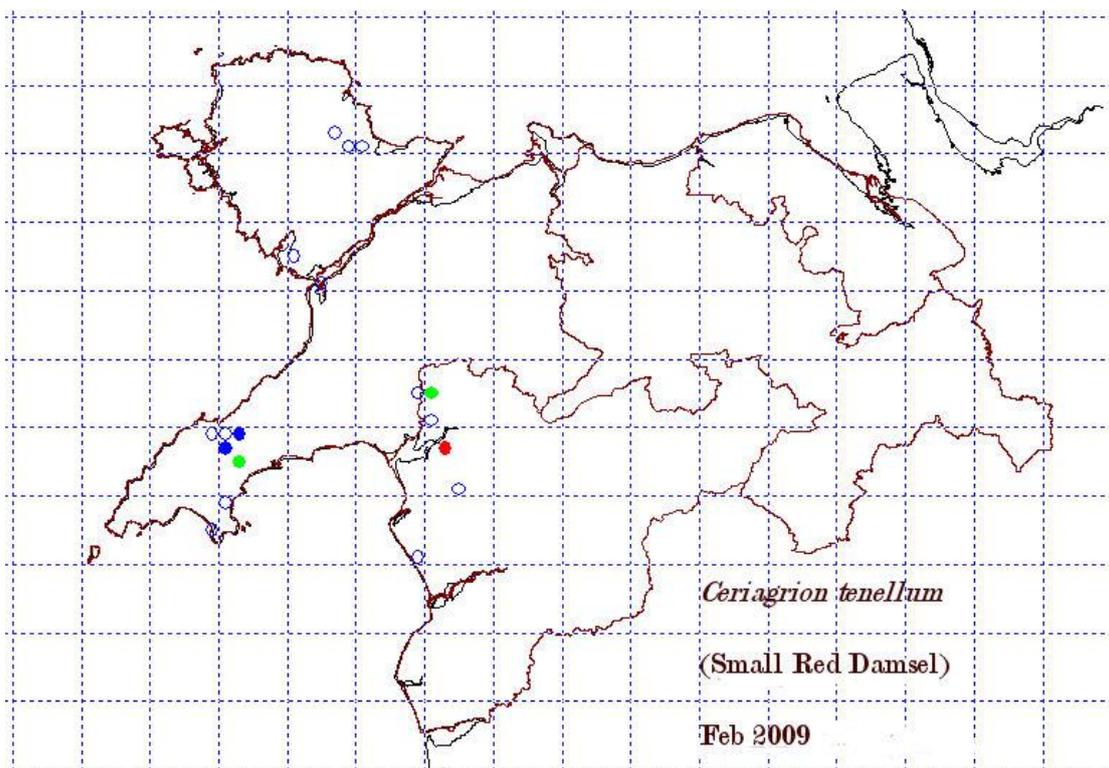

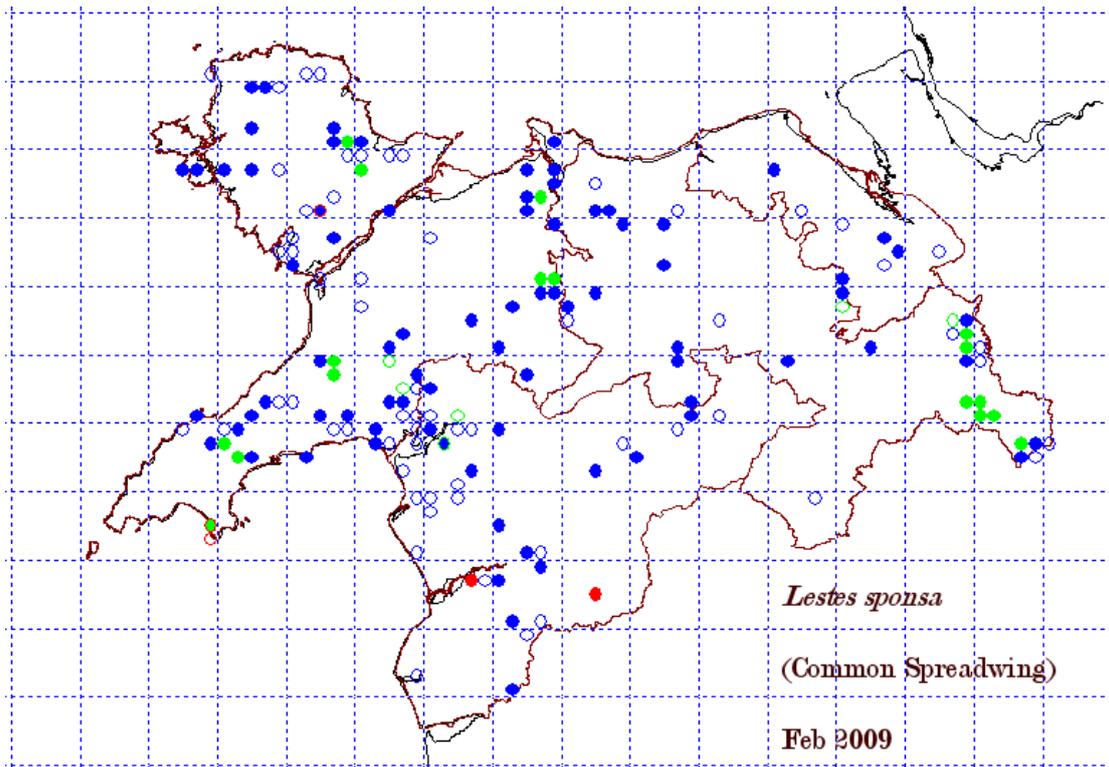

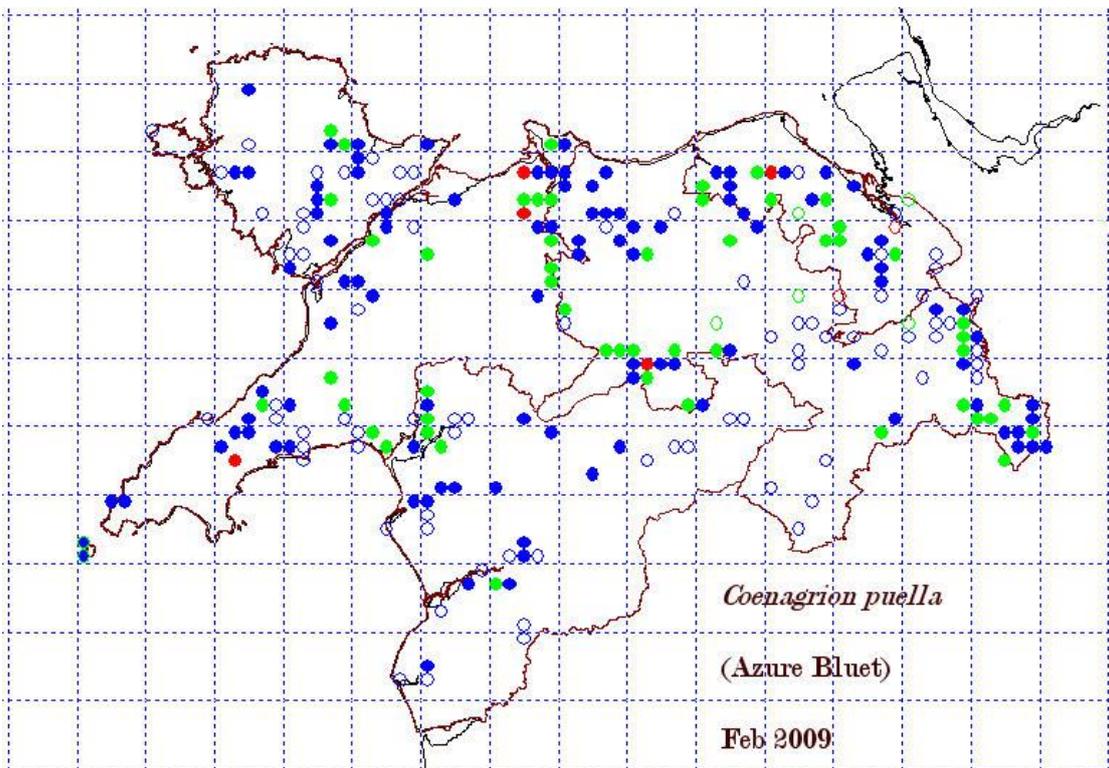

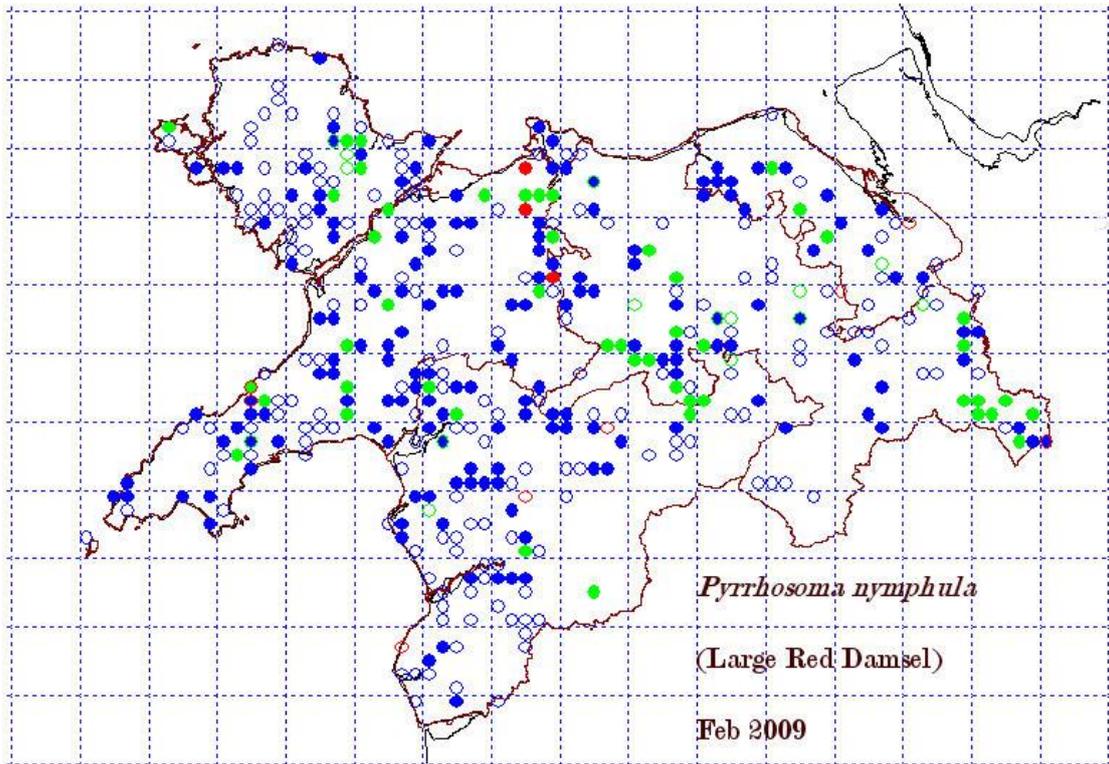

The first plot is of the records of all odonate species in North Wales at tetrad resolution. It is useful in showing the current state of recording and where the main under-recorded areas are. As usual, open circles denote pre-2000 records.

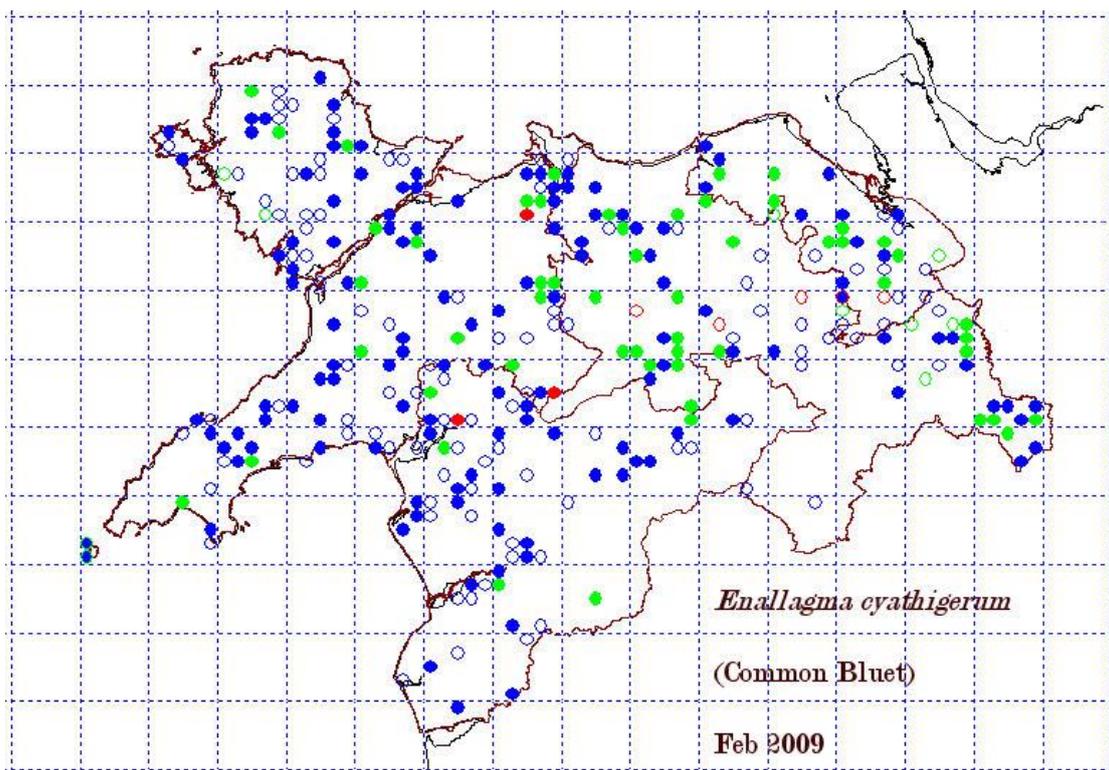

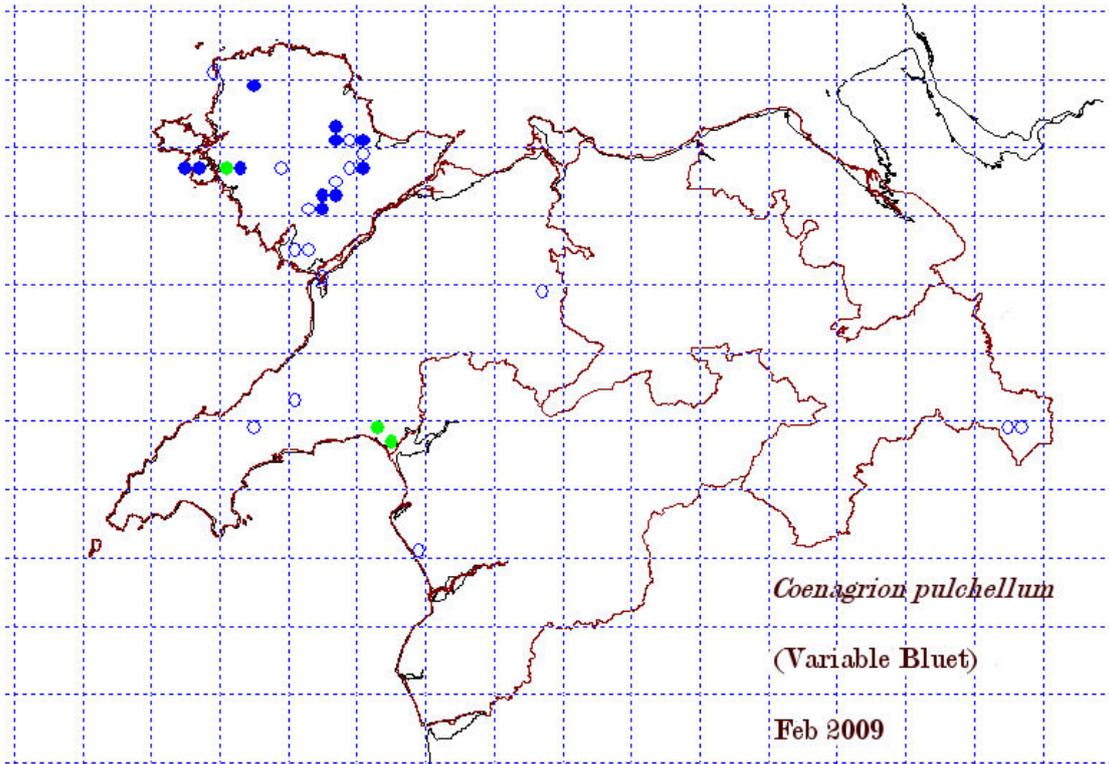

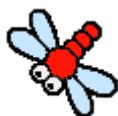

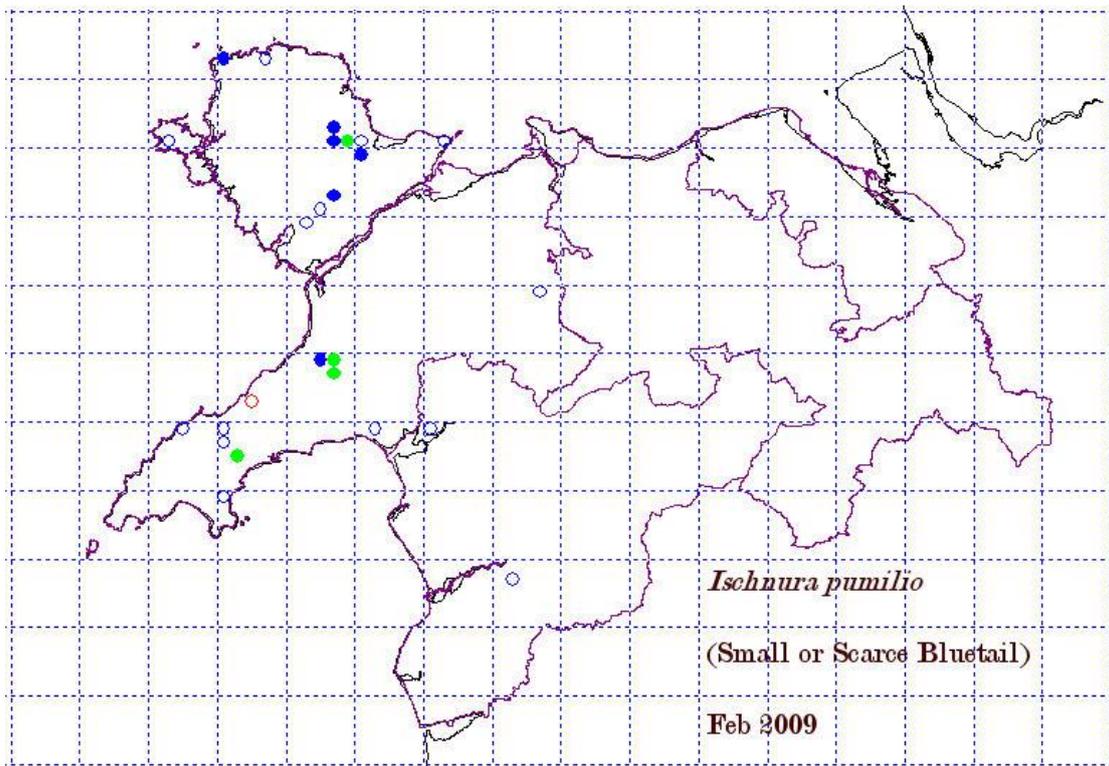

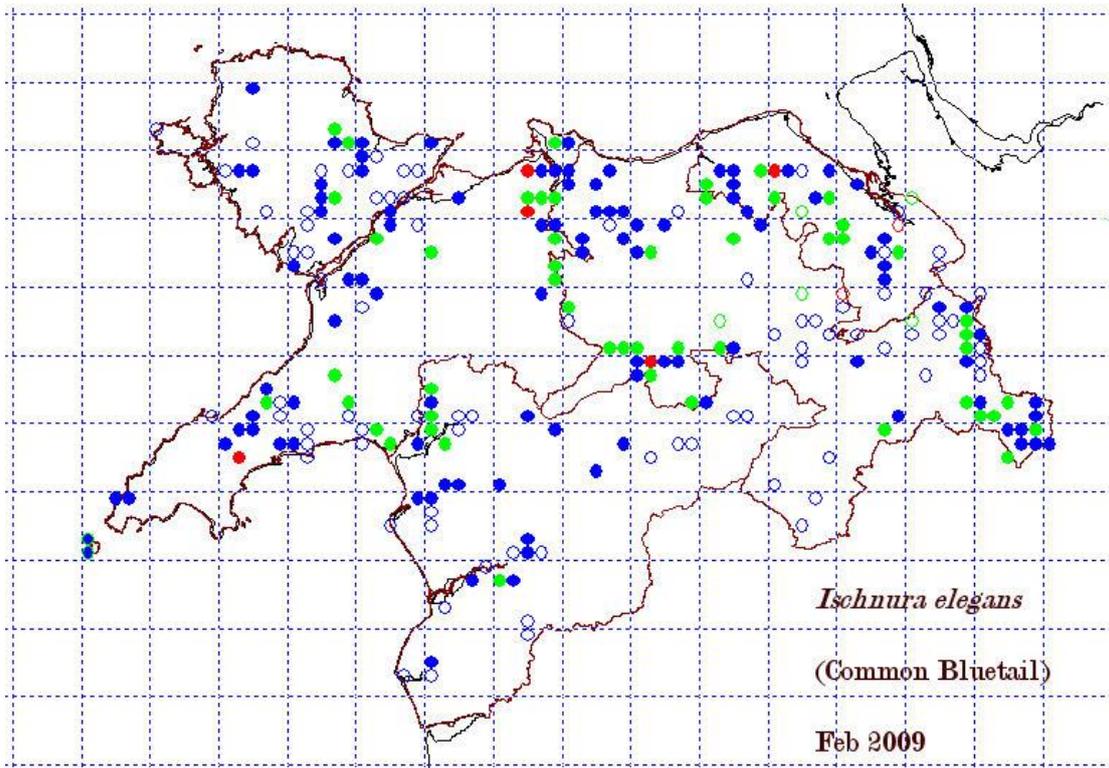

The following are distribution plots of some damselflies following the same style as those of the dragonflies in the last newsletter.

Dr Allan Brandon
North Wales Dragonfly Recorder
Bryn Heilyn, Rowen, Conwy LL32 8YT.
